
”*Together we are going places..*”

/Hans-Åke Book - CEO, Stormbryggan

Hans Åke Book is currently CEO at Stormbryggan, the mother company of Nordperf, BMT PRO and BMUkraine. Hans-Åke has been involved in sheet metal processing for more than 50 years in many different companies. The goal for Stormbryggan is clear, to provide complete solutions to our customers within the own group. Growth will be done together as a group.

Examples of challenging tasks during the many years in the business; selling industrial machines from Soviet to Scandinavia during the cold war. Setting up more than 40 sales offices for industrial machines in the US. Demonstrating the first robot designed for press brake automation in the US. It was bound to be a success, but Hans-Åke might actually have been too early to show this robot.

Connecting Scandinavia with Eastern Europe

”Europe has never been this close”

Stormbryggan has been present in eastern part of Europe for more than 10 years. It all started with the huge expansion of Flextronics and BMT PROs predecessor was born. We are proud to say that Flextronics is still present in our customer portfolio today.

BMUkraine was formed to maintain a high level of service and availability to Flextronics in Ukraine. BMUkraine is growing and the outlooks for 2015 are optimistic with ISO-certification and expansion to new facilities.

Nordperf is one of the, if not *the* strongest supplier of perforation solutions in Scandinavia. With its long experience and well known brand it is a great compliment to our group. Exciting investments with great potential are to be installed during 2015.

”Our goal is to be the best managed, organized and service minded company in our business in Poland.”

/Lukasz Branicki, sales manager BMT PRO

BMT PRO is an engineering and manufacturing company, the establishment of which has been initiated by the group of foreign companies, which have been operating within the sector of mechanical processing of steel ever since the year 1944. Thanks to the aforementioned partnership we are a reliable, well organized and experienced company within the field of international operation.

Our largest receivers are constituted by large companies located in Poland, Spain, Germany and Scandinavia.

We, above all, specialize in the process of manufacturing of elements made of aluminium as well as black, stainless and galvanized steel. Additionally we offer partial and complete assembly of duplex structures, as well as the organization of small and wholesale transport upon the territory of whole Europe.

Exceptionally valuable co-operation with numerous companies based within various industry sectors, over the scope of years have enabled us the systematic increase of our employees’ knowledge and qualifications. Supported by latest technologies, the aforementioned traits, allow us to offer the highest quality of products within short execution deadlines, at the competitive price range.

The co-operation with companies which represent various trades has undoubtedly had significant influence upon our development. Thanks to the fact that we have been able to adjust to the specifics of practically any industry sector, as of now our products are applied within the very broad spectrum of applications worldwide.

We are ISO-certified with ISO-9001 and ISO-14001

**”We have the
knowledge to
keep your
costs down.”**

/Per Hedberg - CEO, Nordperf

At Nordperf we are experts in making holes in sheet metal. We don't like to barge about low price level, high quality, delivery precision and customer service, for us this is normal procedures and obvious for us to stay on this market.

What really makes Nordperf interesting amongst others is the fact that we are small but strong. One main advantage is our flexibility due to short internal lead time. If you would want something changed, this can be arranged even if late in our process. We are always prepared to help our customers when in need. This involvement and straight forwardness for every customer makes Nordperf a stable and desirable supplier.

The sheet metal and patterns may vary. Everything from hot and cold rolled sheet metal to modern high strength materials. The metal comes in sheet form and coils, in both thin or thicker material.

Nordperf is a modern industrial company that handle's most sorts of perforations, small or large. We are present in various business areas, often seen in the background, behind our customers. Just where we want to be.

Our only task is to perforate as shown on customers drawings. It may sound simple, so please challenge us with new advanced patterns our use one of many existing patterns.

We are ISO-certified with ISO-9001 and ISO-14001

For us it does not matter if you are a purchaser, designer, architect or constructor. We believe you will gain by contacting us early in a early phase of your process. We would love to share our experience and knowledge to your project. Just a short talk in starting phase can save time and money in following production phases. We strive for an openness in all our business relations.

”Strategic geographical location with 5km to EU border.”

/Dmitriy Demchenko Business Development Manager, BMU

BMUkraine is the youngest of the three in our group. But for certain one with great potential. It was formed in 2007 by support from Stormbryggan. Its location in eastern part of Ukraine is a big advantage regarding logistics and works as an window for Europe.

BMUkraine has established itself within the group as reliable specialists in assembly.

By manual assembly we refer to advanced products, operational testing, packaging and delivering to stores and distributors. We want to be able to provide customers with a total responsibility for their products. From start to finished product.

Experienced organisation with an eager to grow has taken BMUkraine to its current position and is now ready to take the next step.

During 2015 the company will undergo ISO 9001 and ISO 14001 certification. Move to newer facilities and take a bigger part within our industrial group. Although it's a small group, together we are strong.

Main target for BMUkraine for coming years is to establish its roll within the group and become more stable with customers in various markets.

This will be done by attending developing business relation with mother company Stormbryggan. Proving BMUkraine's vast experience and modern organisation useful to new customers. With weekly scheduled on time deliveries to Scandinavia BMUkraine shows it's here to stay.
